

SAP BUSINESS INTELLIGENCE

From raw data to smart business decisions

Dramatically improve the management of your organisation by converting data into information, and information into actionable insights. Communicate those insights in easily understood formats to the relevant decision-makers throughout your organisation.

Make sense of your data to discover information

- Integrate and manage SAP and non-SAP data from internal and external sources, for a complete view of your business.
- Analyse and interpret to create practical, timely and actionable business information.
- Apply industry best practice by using a wide range of pre-packaged templates, metrics and reports designed to accelerate the return on your investment.

Put information to work to create business intelligence

- Access tools and capabilities that enable you to easily manage, integrate, analyse – and use – information.
- Combine reporting from multiple business units or separate business entities.
- Apply a planning framework to support forecasting and budgeting, or to accurately test possible business scenarios.
- Consolidate your information into one place and make it securely available wherever it's needed, through your portal and the internet.
- Provide approved users with information in formats that enable timely, well-informed decision making at every level of your organisation and beyond.

Use reliable business intelligence to drive your bottom line

- Manage your business with clear, reliable, up-to-the-minute intelligence.
- Set well-tested strategy that anticipates the future.
- Measure the immediate results of your tactics.
- Respond to market changes and make the right decisions ahead of your competitors.

“Our people took to the new SAP BI system with enthusiasm, as the ease-of-use and quality of the reporting became apparent”

AARON COOPER, FINANCIAL PLANNING & ANALYSIS MANAGER, PLANT & FOOD RESEARCH.

REALTECH

Your SAP Business Intelligence Partner

REALTECH is a global company with a strong presence in New Zealand offering experienced SAP consultancy, development and support. Our headquarters is in Germany so we're able to maintain a close working relationship with SAP and stay at the forefront of SAP innovation.

REALTECH New Zealand has extensive experience and in-depth knowledge in successful SAP Business Intelligence implementations, across a wide range of local industries and businesses.

With the variety of tools delivered from **SAP Business Objects** you have possibilities to analyse your data in totally new ways and reach new type of Business Intelligence consumers.

With the knowledge and experience in implementing Business Objects solutions and integrating them with SAP BI, the BI Team at REALTECH will support your organisation in choosing the right tools, for the right information for the right cost.

A dedicated SAP Business Intelligence team

With the specialisation of a dedicated SAP Business Intelligence team we can offer the breadth of experience and the level of skills required to ensure your needs are met.

Business knowledge

Our consultants also have a high level of business management experience in a variety of industries and businesses. They can help you to accurately describe how your organisation operates and translate that into precise relationships between your data.

Application and technical know-how

Our people have the technical skills to ensure your design, architecture and build allow SAP Business Intelligence to efficiently manage vast amounts of data and deliver useful information in a timely manner - specific to your requirements.

Strong reputation

With REALTECH you have the reassurance of knowing you're dealing with an organisation that's recognised for reliability, depth of experience, professional project management, exceptional SAP performance tuning and strong support. We'll begin by thoroughly understanding how your organisation operates, we'll stay with you until everything is as it should be, and long after go-live we'll still be right here if you need us.

"DB Breweries has a long history with Realtech both in the SAP Basis area and the BI/Netweaver space.

Realtech has been incredibly valuable as an SAP partner and our most recent program of work implementing Integrated Planning in Netweaver has been extremely well received by the business and will be core to our Knowledge Management role out through 2011.

Realtech has provided both excellent advice on our SAP landscape as well as excellent people who are focused yet easy to deal with when implementing projects.

MIKE RAWSON, BW TEAM LEADER, DB BREWERIES
