THE INTRODUCTION OF REALTECH'S
THEGUARD! TRANSPORTMANAGER WAS

A TRULY WORTHWHILE INVESTMENT. THE MONEY
WE SAVE IN LABOR ALONE WAS ENOUGH TO ALLOW US TO BREAK EVEN IN NO TIME. THIS HAS
GIVEN US THE RESOURCES TO FOCUS ON SPECIFIC IT PROJECTS.

**Thomas Kräuchi,**Member of the SAP Basis team at Migros Aare

**Migros** Aare is the largest of the ten regional Migros cooperatives. The cooperative is active in the Swiss cantons of Aargau, Solothurn, and Bern and has more than 200 supermarkets and specialty stores, among them the "Westside" in Bern, Europe's most modern shopping mall. Migros' has a total of ten club schools, its "recreational division" operates numerous health clubs and gyms, the Moossee golf course, and the "Green Meadow Park" on Mount Gurten. Migros Aare has some 12,000 employees and reported revenues of more than CHF3.4 billion in 2008.

## SECURE YOUR TRANSPORTS - FREE UP RESOURCES

Migros is just a little bit different from most other Swiss companies:

it's larger, more versatile, takes a different organizational approach, and has a long tradition of social and cultural commitment that goes far beyond its commercial objectives. In order to stay ahead in terms of system security and performance, Migros Aare decided to automate its SAP transport processes with the Guard! Transport Manager.

İ

## THE CHALLENGE

Before the automation of the SAP transport processes, a Migros employee had to spend half a day every day manually checking and importing the transports into the company's three SAP system landscapes "FICO", "SUS", and "RETAIL" with some 80 clients. A team of four SAP Basis administrators at Migros Aare took turns in processing the more than 2,000 annual SAP transports.

This manual process, however, was highly error-prone. It also tied up resources that could otherwise have been directed towards important IT projects. The need for an automated transport management solution grew along with the system landscapes at Migros Aare.

Migros Aare narrowed down its search for a suitable software solution for the automation of its SAP transport processes to two possible candidates: SAP Solution Manager and REALTECH's the Guard! Transport Manager.

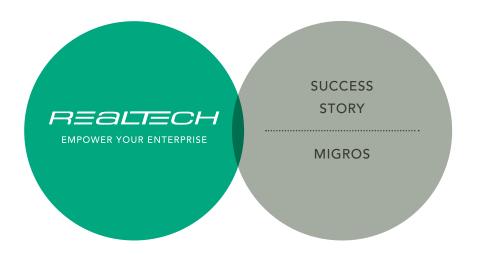

A visit to Antalis AG, a REALTECH reference customer, tipped the scale in favor of the-Guard! TransportManager. The Swiss company has been successfully using the solution in a similar environment for a number of years now. the Guard! TransportManager had all the features that Migros Aare wanted. The prospect of a rapid ROI was another point in favor of the REALTECH solution.

The implementation of the Guard! Transport Manager was completed quickly and with out complication. It only took three work days to successfully implement the software on Migros Aare's three SAP system landscapes "FICO", "SUS", and "RETAIL".

## THE RESULT

theGuard! TransportManager has significantly reduced the daily workload for SAP Basis administrators at Migros Aare. Today, they spend no more than one hour per week on SAP transport management tasks. Only 1-2% of their resources are still reserved for emergency transports. This affords them more time to tackle IT projects. The IT landscape at Migros Aare has grown to a total of six SAP system landscapes since the introduction of theGuard! TransportManager in 2005. Without it, the company would need a SAP Basis administrator working full-time on the manual processing of SAP transports.

Since its introduction one and a half years ago, the latest expansion of the system land-scape for the "Globus" department stores (with an additional six SAP systems) has already seen some 6,250 transport requests ("BW" and "RETAIL") that were automatically processed with the Guard! Transport Manager. The REALTECH software has handled a total of almost 25,000 transport requests since 2005. The money that Migros Aare saves in labor alone has made the Guard! Transport Manager a worthwhile investment that paid off in no time.

## **ABOUT REALTECH**

REALTECH is an international technology company with unique expertise in SAP and Microsoft solutions. REALTECH helps companies shape the future of their IT organization and get the most value out of their IT assets – from consulting services to implementation and efficient operation. It pursues innovation by incorporating the latest in Industry 4.0, cloud, mobile, and in-memory computing in its customer projects. For more information go to: www.realtech.com
